Taking care of your heart may be as easy as going for a stroll. Men and women who spend more than 40 minutes walking at an average to fast pace two to three times a week had an almost 25% lower risk of heart failure, according to a recent study in the *Journal of the American College of Cardiology*. "It's well established that physical activity decreases the risk of heart disease, and we found that walking gives women some real benefits without a special fitness program."

**Each Sunday during worship we offer care for young children in our nursery. The nursery workers provide a warm and caring place where infants and small children can receive Christian Love. It is also a place where they can play and experience Christian Social Values. This is a wonderful ministry. Currently, we have two positions open for nursery workers. If you are interested, contact Ed Kelly at (509) 928-1600**
